PROGRESS REPORT

E7.4-10237.

CR-136535

Evaluation of Satellite Imagery as an Information Service for Investigating  
Land Use and Natural Resources (Skylab). NASA Contract NAS 9-13364

This report covers the period from December 1-31, 1973. During this  
reporting period, little or no significant progress was made. Primary  
reasons concerned lack of any Skylab data. However, slow returns on the  
questionnaire sent out to assess the needs of wildlife managers and those  
persons, both at state and federal levels concerned with habitat management,  
have delayed compilation of the final results. By January, it is expected  
that the data will have arrived and a nearly full staff will be working on  
the data.
